CODE 4 CT

TUTOR AT CODE CAMP

Code4CT introduces high school girls to basic web development skills and using technology for social impact.

WHAT WE TEACH:

- HTML, CSS, JavaScript (intro level)
- Design Thinking (you will be briefed on how to facilitate these lessons)
- Professional communication

If you are unfamiliar with any of these, but still would like to tutor, please do contact us and we will send you content to go over. You will be briefed and trained prior to lessons starting.

WHY YOU SHOULD TUTOR:

- Gain leadership experience
- Increase your knowledge of web development through our free tutor training course
- Be exposed to the local tech industry through the various speakers who attend Code4CT classes
- Receive a reference letter upon successful completion of 48 hours of tutoring
- Code4CT will send your CV and accompanying reference letter to 3 companies of your choice within the Code4CT network
- Attend the Code4CT networking event where our sponsoring companies thank you for your contribution to skills development

WHAT IS A TUTOR'S ROLE?

A tutor facilitates the learning process by pointing the learner toward answers, and providing encouragement and support

DATES:

- 4-9 July
- 11-16 July

LOCATION:

Cape Town
